SUMMARY

Frontend Developer with hands-on experience building production web applications using React, Next.js, and TypeScript. Comfortable owning features end-to-end — from architecture and type-safe data handling with Zod and DTOs, to clean UI implementation and state management. Focused on writing maintainable code and shipping interfaces that feel fast and reliable. Currently deepening expertise in scalable frontend architecture and performance optimization.

PROFESSIONAL EXPERIENCE

Wiz Holdings | Frontend Developer – Full Time

Nov 2025 – May 2026

- Build and maintain features across production applications (Wiz Jobs and internal products) using React and Next.js, balancing new development with improving existing functionality.
- Integrate REST APIs and implement authentication flows along with complex multi-step UI logic.
- Refactored key parts of Wiz Jobs by introducing Zod validation and DTOs, reducing data-related bugs and making the codebase easier to extend.
- Write and maintain unit tests with Jest and React Testing Library to catch regressions before release.
- Collaborate with backend, QA, and design teams using Git-based workflows to deliver features end-to-end.

Rafiq | Frontend Developer Intern

May 2025 – Aug 2025

- Architected and built a full-featured project management platform using Next.js, TypeScript, and Supabase.
- Designed a hierarchical data model across Workspaces, Projects, Epics, and Tasks.
- Engineered dynamic task management experiences including drag-and-drop Kanban boards, searchable list views, and timeline-based planning workflows.
- Implemented authentication, role-based access control, team invitations, and secure session management.
- Optimized application performance through efficient state management, query caching, and paginated data fetching.
- Collaborated with mentors and team members to deliver production-ready features and improve user experience.

PROJECTS

Taskly – Task & Project Management Platform

Demo: taskly-sigma-five.vercel.app | Repo: github.com/Ahmedwafy/Taskly

- Multi-project task management platform with drag-and-drop Kanban boards, epics, and team collaboration. Built with Next.js 16 and React 19.
- Built authentication end-to-end using Supabase's REST/GoTrue APIs directly (no client SDK) — httpOnly cookie sessions, automatic token refresh via Next.js proxy, and Server Actions for auth and team invitations.
- Migrated client state from Redux to TanStack Query with optimistic updates and automatic rollback for a drag-and-drop task board (dnd-kit) kept in sync across views.
- Built type-safe forms across auth, project, epic, and task flows using React Hook Form and Zod.

Tech Stack: Next.js · React · TypeScript · TanStack Query · React Hook Form · Zod · dnd-kit · Supabase (REST/GoTrue) · Tailwind CSS

Monito – Pet Adoption Platform

Demo: monito-liart.vercel.app | Repo: github.com/Ahmedwafy/Monito

- Fully responsive pet adoption website built from scratch with Next.js App Router. Complete adoption journey with client-side filtering, URL-based search, and dynamic routing.
- Created a robust multi-step adoption form with real-time validation, loading states, and error handling.

Tech Stack: Next.js · TypeScript · Tailwind CSS · React Hooks · Mock Data · React Hot Toast

Treatly – Medical Appointment Booking Platform

Demo: treatly-olive.vercel.app | Repo: github.com/Ahmedwafy/Treatly

- Full-stack appointment booking platform for clinics with profile management and filterable booking views. Auth with JWT/bcrypt + MongoDB/Mongoose. UI with Framer Motion and Keen Slider.

Tech Stack: Next.js · TypeScript · MongoDB · Mongoose · JWT · bcrypt · SCSS · Framer Motion · Keen Slider

TECHNICAL SKILLS

Core: React.js, Next.js (App Router, Server Actions, Server Components), TypeScript, JavaScript (ES6+)

State & Data: TanStack Query, Redux Toolkit, React Hook Form, Zod

Styling: Tailwind CSS, SCSS/SASS, Bootstrap

Testing: Jest, React Testing Library

Backend & APIs: REST APIs, MongoDB, Mongoose, Supabase

Tools: Git, GitHub, Bitbucket, Jira, Postman, Apidog

Other: React Native / Expo, Agile / Scrum, Web Performance Optimization

EDUCATION

Bachelor of Commerce – Business Administration 2019

Ain Shams University – Faculty of Commerce (English Section)

LANGUAGES

Arabic: Native · **English:** Very Good
